

ADITYA ANIL

Software Developer & AI/ML Engineer

✉ aditya.anil productions@gmail.com 📞 +91-9958735408 📍 Andhra Pradesh, India 🔗 LinkedIn 🐙 GitHub ✖ Twitter/X

PROFESSIONAL SUMMARY

Highly motivated B.Tech Computer Science Engineering (AI) student and GitHub Top 0.5% Contributor with expertise in building production-grade Machine Learning systems, agentic AI tools, and scalable applications. Experienced in TensorFlow/PyTorch, autonomous systems, full-stack development, and deploying intelligent solutions. Seeking AI/ML or Agentic AI internship to create impactful, scalable systems.

EDUCATION

B.Tech, Computer Science & Engineering (AI), Amrita Vishwa Vidyapeetham Graduating – Sep 2028 | CGPA: 8.7
• Specialisation in Artificial Intelligence with coursework in Machine Learning, Deep Learning, Reinforcement Learning, Natural Language Processing, Computer Vision & Image Processing, Probabilistic Reasoning, Fundamentals of AI, Data Structures & Algorithms, Design and Analysis of Algorithms, Big Data Analytics, Database Management Systems, Operating Systems, AI Robotics

WORK EXPERIENCE

AI and Blockchains Developer, EtherAuthority Dec 2025 – Feb 2026 | Andhra Pradesh, India
• Developed full-stack Token Vesting DApp with Solidity smart contracts, React frontend, and AI-powered financial predictive models for market simulation and portfolio forecasting.
• Designed gas-optimised, secure contracts (role-based access, reentrancy protection) deployed on Etherscan/Telegram with NFT integration.
• Architected real-time Web3 communication for enhanced blockchain-frontend reliability.

Open Source Contributor, GitHub (Self) Jul 2023 – Present | India
• Achieved Top 0.5% Contributor status with 6,000+ contributions in 2024 (plus 3k+ and 2k+ later), across Python, C++, Go, and JS repositories.
• Built AgentTool (autonomous local LLM agent with tool-calling for search/file/execution), RILearn (interactive PWA), and Mars Rover Path Finder (optimised A* navigation with 30% faster computation).
• Contributed features, optimisations, documentation, and community collaboration advancing AI/ML tools.

Web Developer and UI Designer, Young Protons International Council Apr 2023 – Jun 2023 | New Delhi, India
• Engineered scalable MERN Stack features with TypeScript, improving UX per Figma designs.
• Implemented GitHub Actions CI/CD for automated, responsive deployments.

RESEARCH AND PUBLICATIONS

EfficientNet-B0 Multi-Scale Feature Fusion with Enhanced Skip Connections for Polyp Segmentation Jul 2025
IEEE ICCNT 2025 held at IIT Indore
• Developed a U-Net architecture with pre-trained EfficientNet-B0 encoder for accurate colorectal polyp segmentation in colonoscopy images, addressing challenges in early colorectal cancer detection.
• Achieved Dice 0.959 / IoU 0.922 with skip connections (vs. 0.935 / 0.880 without), improving boundary precision for medical CAD systems.

RECENT PROJECTS

AgentTool Jun 2026
• Built an autonomous agentic coding/research assistant powered by local LLMs (Ollama/LM Studio) with tool-calling capabilities for web search, file operations, command execution, and read-search-write loops.
• Demonstrated practical agentic AI workflows by enabling isolated local LLMs to interact with the environment autonomously.

Mars Rover Path Finder Simulation Nov 2025
• Engineered an intelligent simulation for planetary rover path planning using optimized A* heuristic search with terrain-aware cost models and motion primitives.
• Achieved 30% reduction in mean computation time through reactive control strategies.

RILearn Oct 2025
• Led full-stack development and DevOps for a Progressive Web App featuring pop-up dictionary, sentence highlighting, smart note-taking, and Text-to-Speech.
• Implemented CI/CD pipeline, offline capabilities, and client-side persistence for accessible, personalised learning.

TECHNICAL SKILLS

Languages: Python, Java, C/C++, GoLang, TypeScript, JavaScript

AI/ML: TensorFlow, PyTorch, scikit-learn, OpenCV, LangChain, Hugging Face

Web/Full-Stack: React, Node.js, Express, MongoDB, PostgreSQL, Web3/Solidity

OS / Shell: Git, GitHub Actions (CI/CD), Linux/UNIX (Arch, Ubuntu), Docker

Other: Quantum Computing Fundamentals, Ethereum Development, Data Structures & Algorithms

CERTIFICATION

IIT and CDAC Quantum Computing Certification

- Completed an advanced certification covering quantum gates, circuits, simulators, and QML workflows.
- Ranked among top performers out of 28,000+ participants, earning a Certificate of Merit.
- Built and simulated quantum programs while exploring algorithms such as QFT, Grover's Search, and Variational Circuits.

Intro to Machine Learning

- Hands-on machine learning foundations: model training, feature engineering, validation, and deployments.
- Used Python, scikit-learn, Pandas, and NumPy to build baseline ML models.

Introduction to Cloud Computing

- Covered cloud fundamentals: virtualization, containerization, distributed computing, and cloud security basics.
- Applied concepts to deploy personal and academic projects using AWS/Netlify.

RECOGNITIONS

Finalist in DQ Labs Design Hackathon, CII DQ Labs

Jan 01, 2022

- Achieved Finalist position in the DQ Labs Annual Design Hackathon, a design-focused competition emphasizing creativity, problem-solving, prototyping, and user-centric thinking.
- Collaborated in a fast-paced hackathon environment, producing a functional concept backed by clear UX reasoning, rapid iteration, and teamwork.

Gold Medal in Cyber Eduheal Olympiad, SOF Eduheal Olympiad

May 01, 2018

- Secured the Gold Medal in the prestigious Cyber EduHeal Olympiad, ranking among the top national performers in computational thinking, cybersecurity awareness, and logic-based problem solving.
- Demonstrated strong foundational understanding of algorithms, digital systems, and analytical reasoning.

VOLUNTEERING & SOCIAL CAUSES

AI Safety and Ethics Youth Activist

May 2024 – Present

- Volunteer with global youth movement for safe and equitable AI, contributing to campaigns and policy advocacy in India.

LANGUAGES

English – Fluent | Hindi – Fluent | Malayalam – Conversational | German – Basic

HOBBIES

- Writing Blogs and Articles
 - Playing Guitar
- Reading Books
 - Listening Music
- Solving Puzzles (eg. Rubik's Cube)
 - Making Side Projects
